

## SAP Commerce Cloud [SCC]

Q = Is it SAP Commerce Cloud **or** SAP Commerce? = **Both**.

SAP Commerce [Downloadable Commerce Suite] = eComm Solution + PCM.

SAP Commerce Cloud = SAP Commerce + Cloud [Automate Build-Deploy & Self-Service Portal]

Hybris (~1997) ==> SAP Bought Hybris (~2013) ==> SAP Commerce

Hybris – Is the company since ~**1997** & Initially they were in Switzerland. Later they moved to **Germany**. When Hybris is the company – That time Hybris means only **eCommerce**.

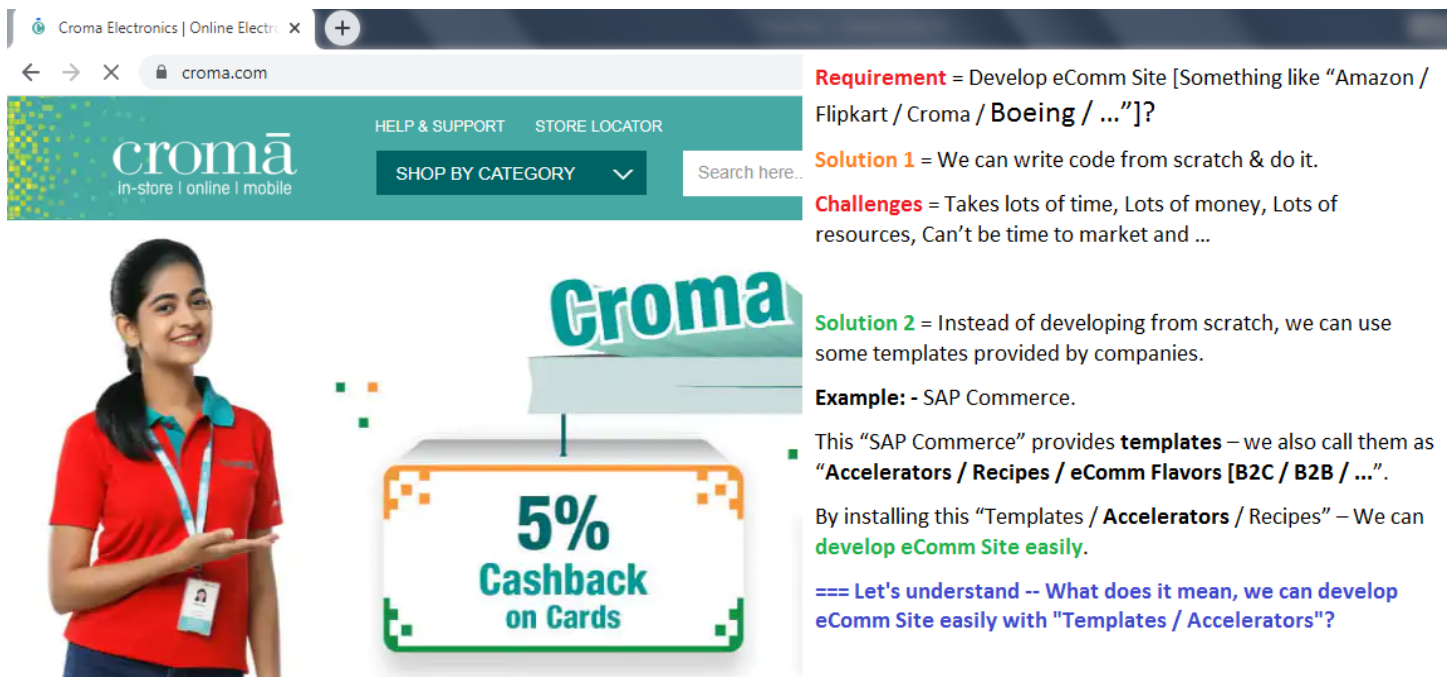

SAP Commerce = **eCom Solution** + PCM Soft

**eComm Solution** =

Croma ... Amazon ... Boeing ... = These are called “eComm Sites [B2C / B2B / ...]”

By using “SAP Commerce” = We can develop something like “Croma ... Amazon ... Boeing ...”.

That means – By using “SAP Commerce” = We can develop eComm Site.

The image shows a screenshot of the Croma Electronics website. The website has a teal header with the Croma logo, navigation links like 'HELP & SUPPORT' and 'STORE LOCATOR', and a search bar. Below the header, there is a promotional graphic featuring a woman in a red Croma shirt and a large 3D box with the text '5% Cashback on Cards'. To the right of the website screenshot, there is a list of requirements, solutions, challenges, and examples for developing an eComm site.

**Requirement** = Develop eComm Site [Something like “Amazon / Flipkart / Croma / Boeing / ...”]?

**Solution 1** = We can write code from scratch & do it.

**Challenges** = Takes lots of time, Lots of money, Lots of resources, Can't be time to market and ...

**Solution 2** = Instead of developing from scratch, we can use some templates provided by companies.

**Example:** - SAP Commerce.

This “SAP Commerce” provides **templates** – we also call them as “**Accelerators / Recipes / eComm Flavors [B2C / B2B / ...]**”.

By installing this “**Templates / Accelerators / Recipes**” – We can **develop eComm Site easily**.

=== Let's understand -- What does it mean, we can develop eComm Site easily with “**Templates / Accelerators**”?

For “SAP Commerce Cloud” --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)

Recipes === Templates === Accelerators === eComm Flavors [B2C / B2B / Telco / ...]

Let's say - Chenna is working for RRRS company & they want - "B2C eCommerce Site & B2B eCommerce Site".

====> Then install this recipe.

Q = Assume that - Chenna completed installing this Recipe. What we get after installation?

Apparel Site UK | Homepage

← → ↻ ⚠ Not secure | localhost:9002/yacceleratorstorefront/?site=apparel-uk

**B2C Accelerator**

80% B2C Site is Ready.

80% Code is Ready.

80% Functionality is Ready.

I'm looking for

Finally -- We take this as base for development & write code on Top of this.

**B2B Accelerator**

80% B2B Site is Ready.

80% Code is Ready.

80% Functionality is Ready.

I'm looking for

Finally -- We take this as base for development & write code on Top of this.

POWER DRILLS ANGLE GRINDERS SCREWDRIVERS SANDERS MEASURING & L

THE MOST

====> So, By using "SAP Commerce", we can able to develop the eCommerce Site easily.

Hence "SAP Commerce" called as "eComm Solution".

**Note:** - SAP Commerce Cloud includes all **core commerce** capabilities [Payment, Support, Omni-channel, Search, Promotions, Carts, Orders, Bundling, Social and ...] that enable you to engage and transact with your customers digitally.

**Product Content Management**

Managing large volume Product Data, Collaboration & Integration capabilities

**Customer Experience**

Provide all Info. reaching your customers to their needs in just a few clicks.

Promotions, Support, Search Results, Suggestions, Storefront Look and ...

**Order Management**

It tracks and displays order and inventory data in real time.

**Commerce Capabilities**

Carts, Orders, Account Management, Delivery, Data Privacy, Search, and ...

SAP Comm Cloud -- Brings Together

**COMMERCE**

For "SAP Commerce Cloud" --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)

Q = How can we **quickly build & deploy Storefront / Site** with all features needed for business?

Q = What are the **Capabilities** that come with all SAP **Commerce Cloud Accelerators**?

- **Platform** = It's core of SAP Commerce Cloud
- **Product Content Management** = Oversee all your product-related information
- **Web Content Management** = Manage all websites & templates, and localize your content
- **Customer Support** = Handle tickets, cancellations, and returns
- **Order Management** = Order fulfillment, returns, and inventory management
- **Store Locator Capabilities** = Help customers easily find your physical shops
- **Search and Navigation Functionality** = Smooth navigation of your web shop
- **Payment Framework Interfaces** = Ready-to-use framework interfaces
- =====

**SAP Commerce** = eCom Solution + **PCM Soft**

**PCM [Product Content Management] Software =**

You take any eComm Site [Croma / Flipkart / Amazon / ...] – There will be 2 important things = **Products & Content**.

**Q1** = How to manage [Add Content / Update Content / Delete Content] this Content?

**Q2** = How to manage [Add Product / Update Product / Delete Product] this Products?

=====> SAP Commerce provides tools to manage this Content & Products Easily.

**For “SAP Commerce Cloud” --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)**

**Content**

Whatever we see on here is called **Content**.  
This content changes very frequently.

Q = Do you think that, Development team will manage this content? = **No**.  
Generally in companies, there will be specific people – We call them as “**Content Manager [CM]**”.  
These people are responsible to manage this Content.

Q = Do you think that this CM are Technical? = **No**.  
If CM is not Technical, then how can they manage this Content?

“SAP Commerce” provides small software called as “Cockpits / SmartEdit / ...”.  
For Content Purpose -- We have -- “CMS Cockpit / SmartEdit”.

By using this “SmartEdit” tool –  
The CM can manage the content easily.

**Mobile Phones** **Products**

Whatever we see on here is called **Products**.  
This Products changes very frequently.

Q = Do you think that, Development team will manage this Products? = **No**.  
Generally in companies, there will be specific people – We call them as “**Product Manager [PM]**”.  
These people are responsible to manage this Products.

Q = Do you think that this PM are Technical? = **No**.  
If PM is not Technical, then how can they manage this Products?

“SAP Commerce” provides small software called as “Cockpits / Product Cockpit / ...”.

By using this “Product Cockpit” tool – The PM can manage the Products easily.

==> By using “SAP Commerce”, we [business] can able to **manage** [add / update / delete] the **products** & manage the **content** easily.

Hence “SAP Commerce” is also called as “**PCM**” Software.

**For “SAP Commerce Cloud” --- Contact Us = ChennaReddyTraining@RRRS.CO.IN**

**SAP Commerce Cloud** = “SAP Commerce” + **Cloud** [Build automation & Self-Service Portal]

**Cloud =**

**Q = Differences between “OnPrem Vs Cloud”?**

**On-Prem**

Like = Own house

Lots of initial investment

Everything you are responsible

Limited Flexibility

Deployments – Manual & You take care

Provisioning – Manual & Takes time

Scaling – Manual & Takes time

Hosting / Infra – Additional Cost

Build Env. – Additional Cost

Database – Additional Cost

Support – Additional Cost

Upgrade – Additional Cost

Disaster Recovery – Additional Cost

Pricing – Based on License

**Cloud**

Like = Rented house

Pay as Use [Just Rent]

Vendor [Who provides cloud] is responsible

Full Flexible [Self Service Portal is available]

Deployments - Automated

Provisioning – Automated & Takes less time

Scaling – Automated & Takes less time

Hosting/Infra –Kubernetes Clusters on Azure

Build Env. – Build & Deployment Pipelines

Database – Included in Azure SQL

Support – Shared ... Self Service Portal & SAP

Upgrade – Technical upgrade included

Disaster Recovery – PRO: 5 mins, RTO: 4 Hrs

Pricing – Pay as you grow [Just Subscription]

**Note:** - Cloud services are available in **3 flavors:** -

1) **IaaS**

2) **PaaS**

3) **SaaS**

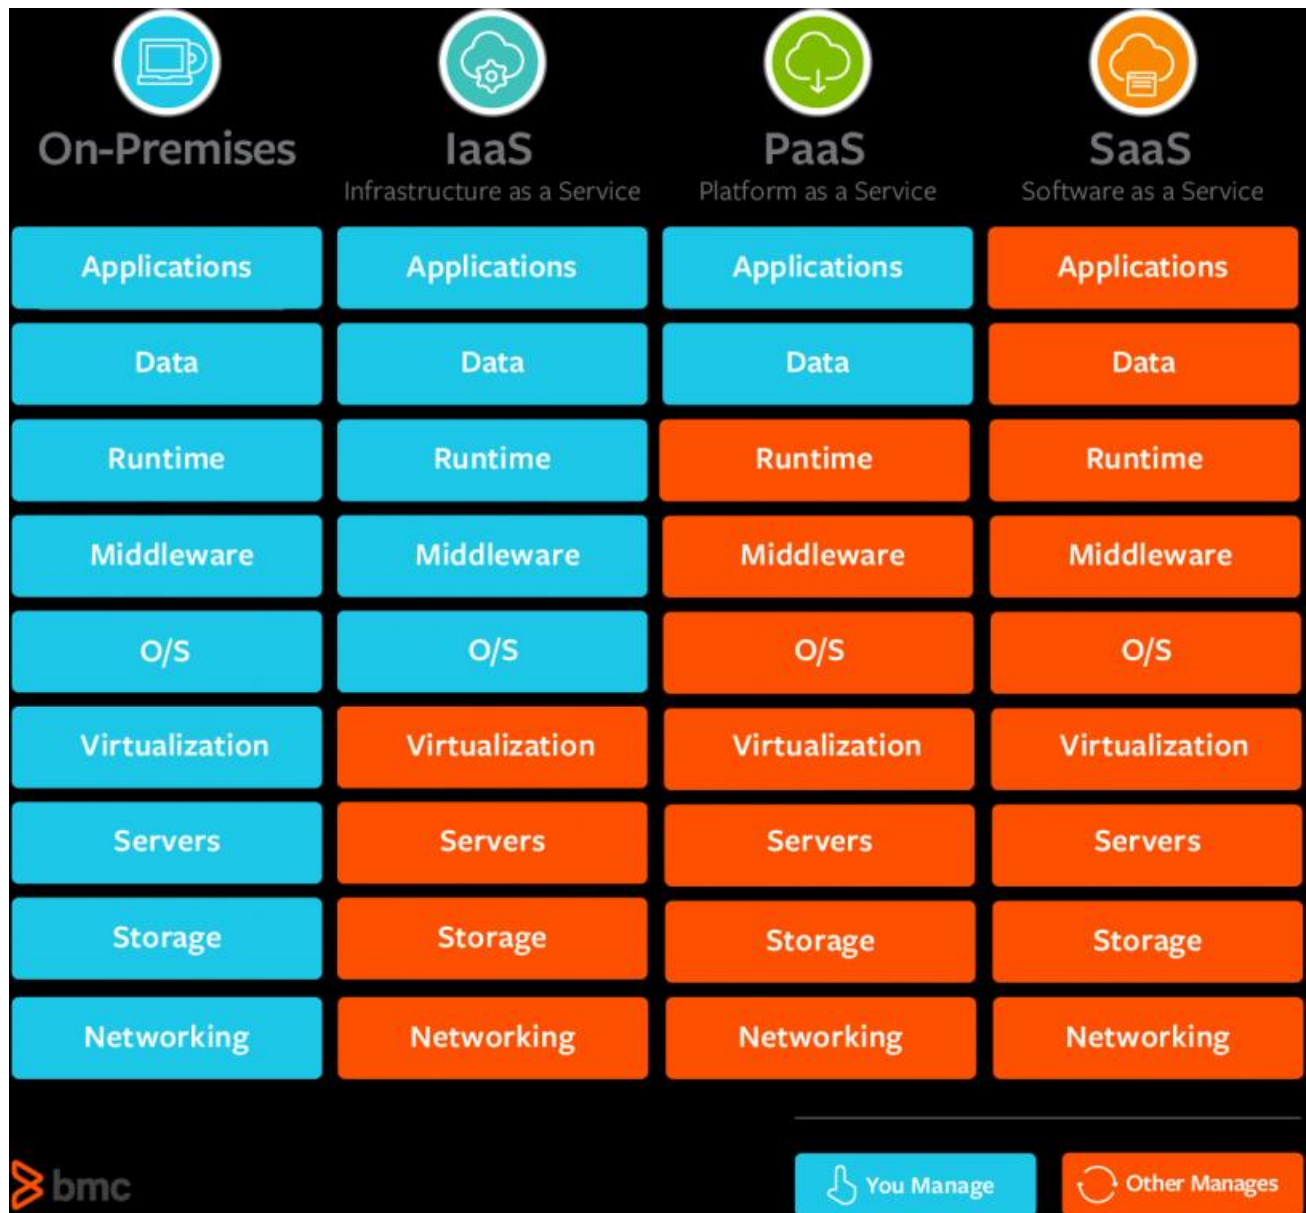

Now – Let’s say ... We want to develop project [Java / .NET / ...] for DRL = **On-Premise**.

To develop this project, we [DRL] need “**Network, Storage, Server, OS, Middleware, Runtime, Data, Application and ...**”.

=== DRL is responsible for all these resources in terms of “Adding resources / Upgrade resources / Resolving resource Errors / ...”. === **Like having own house.**

**For “SAP Commerce Cloud” --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)**

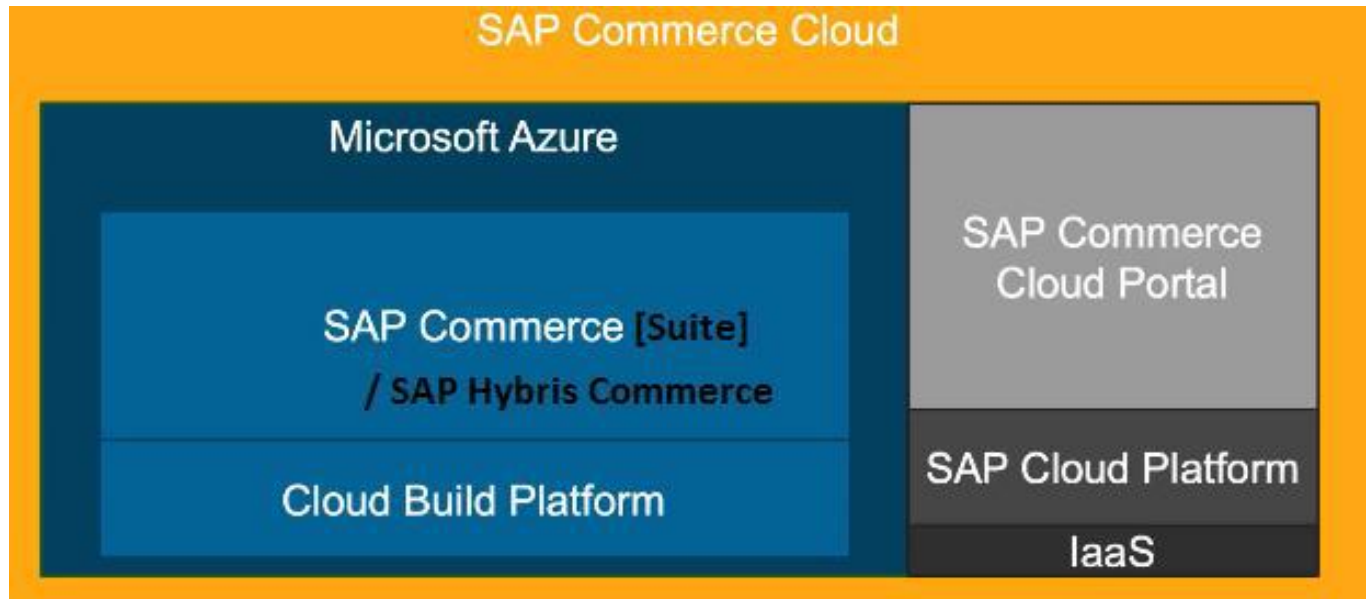

SAP Commerce Cloud == **IaaS** & **PaaS**

For "SAP Commerce Cloud" --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)

**Q = What SAP Commerce Cloud consists: -**

- 1) **MS Azure** = Used to host our Cloud Build Platform that builds all using SAP Commerce [Formally known as SAP Hybris Commerce]
- 2) **IaaS** = This runs the SAP Cloud Platform
- 3) **SAP Commerce Cloud Portal** = It's a self-service portal, where you can manage, maintain, build, and deploy our SAP Commerce Cloud solution

**Note:** - SAP Comm 6.7 (or) Above only – Will support “SAP Commerce Cloud”.

SAP Comm Cloud = Currently the CCv2 version: -

- 1) Drives digital transformation
- 2) Enables you to function as an omni-channel business, delivering contextual customer experiences and unifying customer processes

**Q = What are Benefits with “SAP Comm Cloud” [CCv2]?**

- 1) Public Cloud Infrastructure
- 2) Elastic scaling to meet operational metrics and traffic rushes
- 3) Self-service Environment management
- 4) Disaster Recovery and Backup
- 5) Flexible Deployment [CI] Continuous Integrations

**For “SAP Commerce Cloud” --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)**

**Q = How do we migrate to SAP Commerce Cloud [CCv2]?**

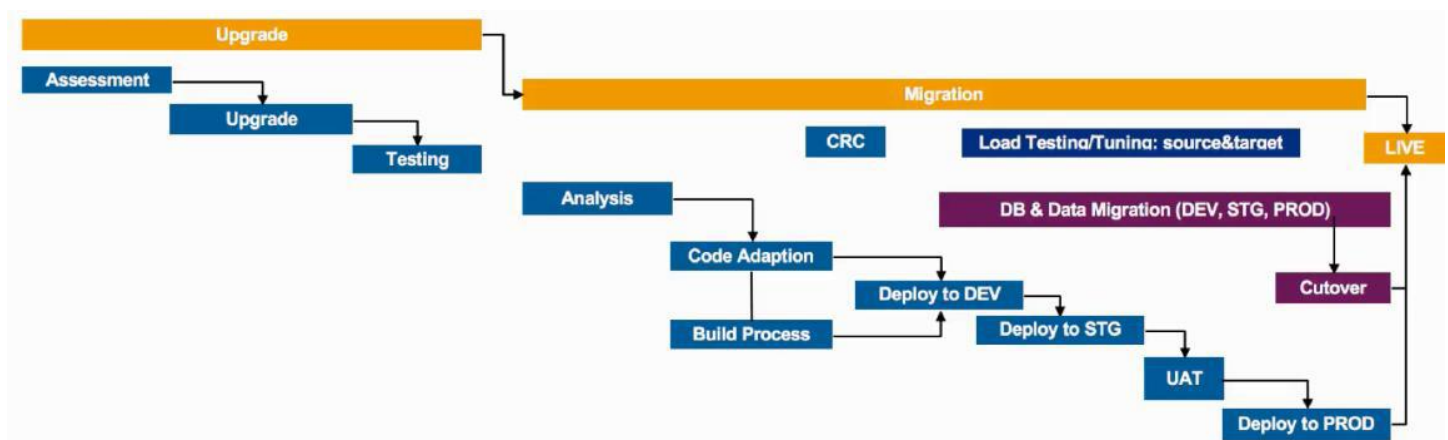

SAP Commerce on-prem / SAP Commerce Cloud product on infrastructure [CCv1] can go **CCv2**.

**High Level Activities =**

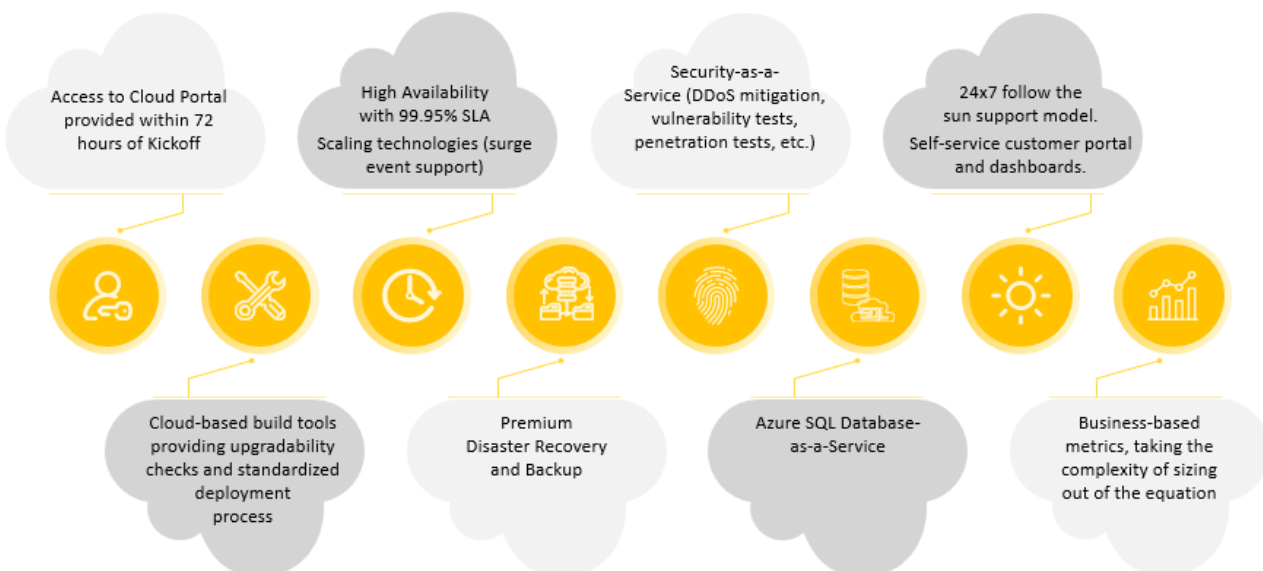

**(1) Upgrade to supported version [6.7 / More]**

**(2) Migrate Your Content [DB & Media]**

Both SAP & Partners can help with many of these steps, **except database** migration step. Bcoz, only SAP has access to the DB. As part of this data migration package, SAP will help move your data, move your media, verify that it's okay, make sure that it works on your environments and ensure that it aligns with our project plans.

**Q = What are the “Benefits of Commerce Cloud?”**

**For “SAP Commerce Cloud” --- Contact Us = [ChennaReddyTraining@RRRS.CO.IN](mailto:ChennaReddyTraining@RRRS.CO.IN)**

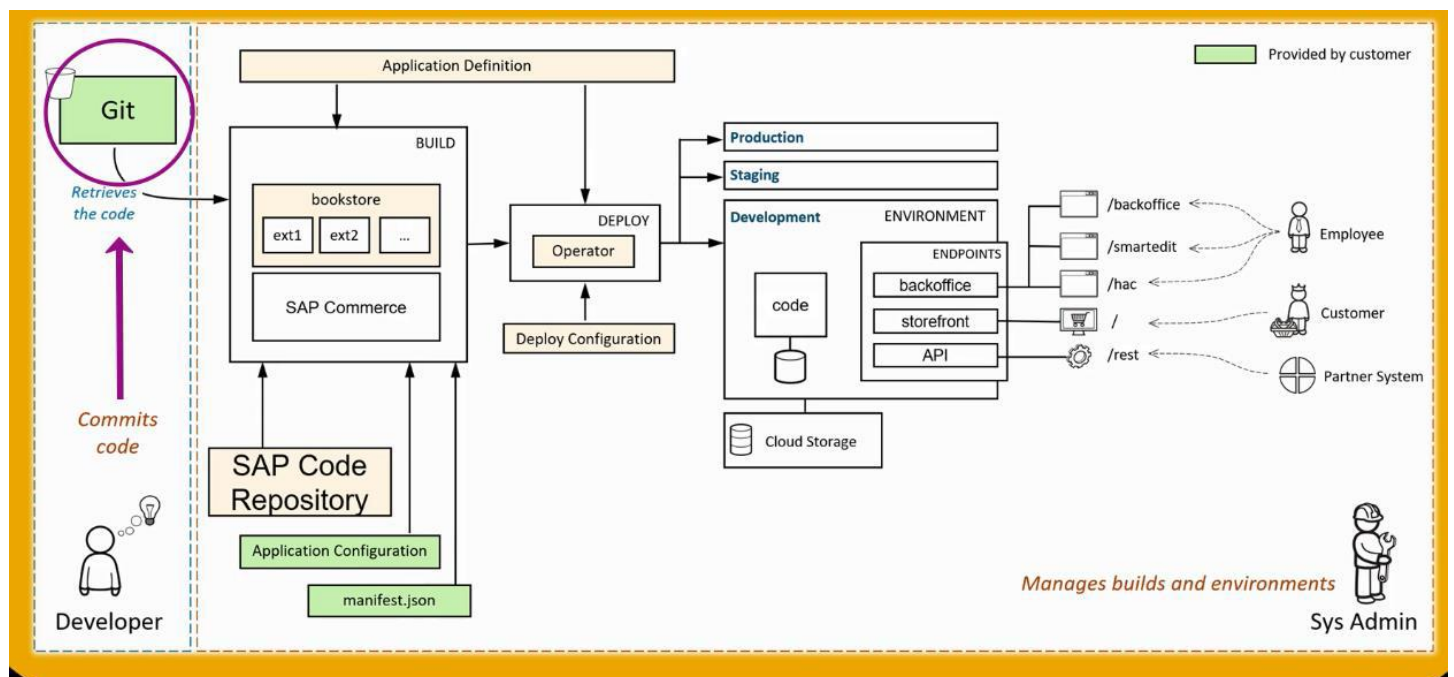

**SAP Commerce Cloud = SAP Commerce + Cloud [Automate Build-Deploy & Self-Service Portal]**

**Customer Cloud Portal** = Enables you to setup & deploy SAP Comm in Public Cloud & Perform other common operational tasks.

The screenshot shows the SAP Commerce Cloud Customer Cloud Portal. The top navigation bar includes the SAP logo and the text "Commerce Cloud". The left sidebar lists various sections: Deployment, Environments (selected), Builds, Subscription Resources, Repository, Security, Static Files, Site Availability, User Management, and Extension Factory. The main content area is titled "Environments" and contains a table listing four environments: d1 (Development), s1 (Staging), p1 (Production), and d2 (Development). Each environment entry shows its Type, Build (with a "Deployed" status), and Status (with an "Available" status).

Environment ID	Type	Build	Status
d1	Development	dev_prod_2020C	Available
s1	Staging	rel_prod_2020C	Available
p1	Production	rel_prod_20200	Available
d2	Development	dev_subshistfix_20200	Available

**Build & Deployment of SAP Comm Solutions =**  
Entire process is automated once deploy start.
